

AI & Co-Design in public libraries

Cultivate symbiotic relationships between Artificial Intelligence (AI) and youth communities

The study aims to:

- Teach the basic concepts of Artificial Intelligence (AI)
- Design and develop simple AI prototypes with hands-on activities

Eligibility:

- Students between 10-14 years old

Study contains:

- One interview (30-40 mins)
- Four AI education sessions (1.5 hours per session)
- Students can **selectively participate** in the sessions

Compensation:

- Participant will receive \$10 per session.
